SIX-YEAR GRADUATION RATE

Definition:

The six-year graduation rate is the percentage of students who graduate within six years of their initial enrollment in a college or university. This metric is used to measure the efficiency of higher education institutions in preparing students for graduation. It is calculated by dividing the number of students who graduate within six years by the total number of students who are first-time, full-time degree-seeking students in the first year of enrollment.

Discussion/Evaluation:

The six-year graduation rate is a key indicator of institutional effectiveness. A high graduation rate suggests that students are progressing through their programs efficiently and that the institution provides the necessary support and resources for success. Conversely, a low graduation rate may indicate challenges such as inadequate academic preparation, lack of student engagement, or insufficient institutional support.

CAREER SERVICES SUCCESS RATE

Definition:

The Career Services Success Rate is defined as the percentage of graduates who have secured employment, graduate school, or non-traditional experience within 90 days of graduation. This metric is calculated by dividing the total number of graduates who have secured employment, graduate school, or non-traditional experience by the total number of graduates. For example, if 100 graduates are surveyed and 20 have secured employment, graduate school, or non-traditional experience, the success rate would be 20%.

Discussion/Evaluation:

The Career Services Success Rate is a key indicator of the effectiveness of our career services. It measures the percentage of graduates who have secured employment, graduate school, or non-traditional experience within 90 days of graduation. This metric is calculated by dividing the total number of graduates who have secured employment, graduate school, or non-traditional experience by the total number of graduates. For example, if 100 graduates are surveyed and 20 have secured employment, graduate school, or non-traditional experience, the success rate would be 20%.

UNDERGRADUATE

Immediate Plans	2019	2020	2021
Success Rate	6.6%	4%	7%
